

Why did the O₂ increase?

Use the diagram below to illustrate what you know about the two processes that affected the amount of oxygen in the atmosphere.

- 1) Name them on the provided lines.
- 2) What evidence did we discuss for each process that helped us to understand what was happening with oxygen over the history of early Earth?
- 3) Draw pictures to “Illustrate the Connection” between the process and oxygen in the atmosphere. And lastly,
- 4) Answer the question: What was the main driver of the change?
